Ergonomic comfort with every click: Speedlink presents the wrist-friendly MANEJO Ergonomic Vertical Mouse

Weertzen, January 17, 2019: Speedlink presents the MANEJO Ergonomic Vertical Mouse – a device that makes working in front of the screen much more relaxing. Plus, it comes in wired and wireless versions.

Moving a mouse across the desktop for hours on end can cause fatigue and pain in the wrist. Today it's common for people to suffer from repetitive strain injuries or carpal tunnel syndrome. The ergonomic Speedlink MANEJO mouse offers a relaxing alternative.

“Once the pain sets in, it's usually too late. That's why we wanted to tackle the cause of the issue. We have developed ergonomic products that promote more natural postures. Our MANEJO Ergonomic Vertical Mouse enables users to work on their PC without forcing them into positions that put unnecessary strain on the muscles, tendons, or joints. The MANEJO allows them to work in a healthy and more relaxed way,” explained Mike McCoy, Country Manager of Speedlink USA.

The MANEJO mouse is held in a natural position. This means the arm and wrist are in more neutral positions. Because the Manejo has a precise, smooth-action scroll wheel, less strain is placed on the fingers which reduces fatigue.

“Working in front of the screen has given rise to new medical conditions and forms of strain. In this regard, we will continue to work on ergonomic alternatives to standard computer peripherals,” said Mike summing up.

The MANEJO is available as a wired USB and wireless version.
